## ABOUT ME

Fullstack web developer with a foundation in .NET and backend development, and solid practical experience in frontend development with React and Next.js. I build responsive, interactive, and multilingual web solutions using TypeScript and Material UI, focusing on usability, performance, and seamless integration between frontend and backend via APIs.

Experienced in seeing the big picture and understanding how system components interact to deliver solutions that combine functionality with high-quality user experience. Currently deepening my knowledge through the Frontend Developer program at Lexicon (November 2025 – August 2026).

## WORK EXPERIENCE

### Frontend Developer (Internship)

FemClinic / Stockholm / Jul 2025 - Nov 2025

- Actively contributed to the localization of FemClinic's website, enabling content to be offered in both Swedish and English.
- Designed and developed dynamic, responsive, and user-friendly interfaces using Next.js, TypeScript, and Material UI, focusing on enhancing user experience and creating a modern, visually appealing website.
- Participated in the development of FemClinic's landing page, optimizing structure, performance, and design to deliver a fast, intuitive, and professional experience for visitors.
- Implemented API integrations to connect the frontend with the backend and database, enabling seamless data handling, real-time updates, and interactive functionality that improved the user experience.

### Junior Full Stack Developer (Internship)

PositionEtt / Dec 2024 - May 2025

- I developed reusable and dynamic components such as charts, menus, and navigation bars in React, contributing to the modernization of upcoming applications.
- Developed a working prototype of a mobile version of the company's internal time-tracking system in React Native, demonstrating the potential to integrate native mobile apps with FileMaker databases.

### Junior Developer (Internship)

A&E Labs / Jun 2024 - Sep 2024

- I have participated in the development of a mobile-friendly web application in React, using Firebase as the backend solution for authentication and data storage.

### Audio Engineer

Freelance / Sep 2019 - Oct 2022

- I was responsible for sound systems, rigging, and technical operations at concerts, events, and theater performances.
- Ensured high sound quality and smooth technical execution.
- Additionally, I worked with artist services and often took on the role of stage manager, which required strong collaboration skills and leadership.

## EDUCATION

### Frontend Development

Lexicon / 2026

- An intensive advanced training program focused on HTML5, CSS3, JavaScript/TypeScript, React, and Next.js for modern frontend development.
- Work following agile methodologies and using Git/GitHub for efficient version control.
- Project-based learning aimed at developing responsive, accessible, and dynamic web applications.
- Concludes with a 12-week internship to apply knowledge in a professional environment.

### Fullstack Development .NET

Chas Academy / Stockholm / 2025

- Completed the YH program Fullstack Developer .NET at Chas Academy (400 YH credits, approx. 2 years) with a focus on the full web stack.
- Fundamentals of system development with a focus on C# and .NET.
- Frontend development including HTML, CSS, JavaScript, React, modern frameworks, UX, and WCAG guidelines.
- Backend/API development with ASP.NET Core, REST, JSON, authentication/authorization (JWT, OAuth2, Azure AD), Test Driven Development, Unit Testing, and microservices.
- Knowledge of databases and data modeling: SQL, ORM (Entity Framework), database design, performance optimization, and security.
- Experience with Cloud & DevOps: packaging, cloud deployment (Microsoft Azure), CI/CD pipelines, security, and system operations.
- Practiced agile methodologies: Scrum/Kanban, teamwork, version control (Git), TDD, and code review.

### Master in Audiovisual Studies

Högskolan Dalarna / 2021

### Audio and Music Production

Högskolan Dalarna / 2020
